14. Brief Introduction:

EISENHARDT = IRON + HARD + HEART

Founded in 1977, EISENHARDT is a leader scrap recycler www.eisenhardt-recycling.de, a famous trader www.eisenhardt-trading.com and an experienced constructor www.eisenhardt.com.ar with 3 scrap yards.

EISENHARDT is licensed to export scraps worldwide and WEEEs under Basel Convention.

Our family started on 1977 on construction business and demolition. With demolition came the recycling and trading business of ferrous, non-ferrous and lately WEEE. Our experience fosters a global attitude and commitment. EISENHARDT's approach is to create value for all interested parties, including society in general.

With a remarkable trajectory processing scrap metals and supplying commodities, shipments done to the 5 continents and 8 Internationals Awards won. EISENHARDT supplies to local and foreign industries and factories sustained high quality materials. Our markets are Argentina, Brazil, China, Germany, Hong Kong, India, Indonesia, Japan, Malaysia, Paraguay, Singapore, Spain, Taiwan, Turkey and Vietnam.

EISENHARDT sells our materials weekly on local market, unless we have better terms to export any our processed materials. Only from our branch, we exported over 400 MT of our high quality copper to exigent markets of Japan and Brazil. <https://www.importgenius.com/paraguay/exporters/eisenhardt-sociedad-anonima>

Insulated Copper Wire Scrap

ISRI Druid

DESCRIPTION: Shall consist of No. 1 bare, uncoated, unalloyed copper wire (see Barley), not smaller than No. 16 B & S wire gauge (unless smaller wire gauge is mutually agreed upon), with various types of insulation. To be sold on sample or recovery basis, subject to agreement between buyer and seller.

Copper Ingot / Brass / Aluminium ingots

DESCRIPTION: EISENHARDT melts and refines pure copper, brass and aluminium ingots produced with our electric furnace. Shiny and polished finished. The copper content is 99,99% as determined by electrolytic assay.

Copper is obtained raw by concentration, roasting and melting in electric furnaces. This metal is purified to 99.99% by refining, by means of fusion in a reverberatory furnace with additives that form slags with iron and nickel. Then the existing copper (I) oxide is reduced with carbon. Subsequently, the electrolytic refining is carried out.

8. BRASS – BRONZE Cu-Sn

Red brass solids

ISRI Ebony

DESCRIPTION: Ebony Red Brass Scrap consists of 85% copper, 5% tin, 5% lead, iron 0.05% and 5% zinc. It includes red brass solids scrap and may consist of valves, machinery bearings and other red brass solids, consisting mainly of copper with tin/lead/zinc alloys.

Composition of Red Brass shall consist of red brass scrap, valves, machinery bearings and other machinery parts, including miscellaneous castings made of copper, tin, zinc, and/or lead.

Shall be free of semi-red brass castings (78% to 81% copper); railroad car boxes and other similar high-lead alloys; cocks and faucets; closed water meters; gates; pot pieces; ingots and burned brass; aluminum, silicon, and manganese bronzes; iron and non-metallic.

Heavier pieces acceptable upon mutual agreement between buyer and seller.

EBONY Brass Scrap appears reddish in colour due to the large amount of copper content.

Yellow brass scrap

ISRI Honey

DESCRIPTION: Honey Yellow Brass Scrap is a copper alloy that comprises of about 60-70% copper, 30-40% of zinc, tin and lead in traces.

It consists of mixed yellow brass solids, including brass castings, rolled brass, rod brass, tubing and miscellaneous yellow bronzes, including plated brass. Yellow Brass Scrap must be free of manganese-bronze, aluminum bronze, unsweated radiators or radiator parts, iron, excessively dirty, corroded materials, paint, plastic, washers, glass, etc. Must also be free of any type of munitions including, but not limited to, bullet casings.
